## Career Objective

Computer science student eager to contribute technical proficiency in C, C++, Java, and data structures. Seeking to apply programming skills and gain valuable experience in web development, with a focus on collaborative projects and innovative solutions."

---

## Skills

Java	Data Structures	JavaScript	MySQL
Data Visualization	C/C++	Python	PHP

---

## Internships

02-2024- 03-2024

### Web Development at CODEWAY

I recently completed my web development internship offered by Codeway.

03-2024- currently pursuing

### Digital marketing at Intershala

Currently I'm an internshala student partner (ISP). In this I have to help student to take courses from internshala, help them to know the benefits of courses that are provided by intershala.

---

## Professional Training

05-2023 - 06-2023

### Firebase from AWS IOT from OriginTech

I have completed my first internship cum Industrial training program by OriginTech. Though it was virtual training program but I learned a lot from this.

---

## Projects

### **Drivers' safety System**

A countless number of people drive on the highway day and night. Taxi drivers, bus drivers, truck drivers and people traveling long-distance suffer from lack of sleep. Due to which it becomes very dangerous to drive when feeling sleepy. The objective of this intermediate Python project is to build a drowsiness detection system that will detect that a person's eyes are closed for a few seconds or the area near their ears are covered with phone for certain period of time. This system will alert the driver when drowsiness or engagement on mobile is detected

### **Blood Bank management System**

- The project is a comprehensive Blood Bank Management System developed using HTML, JavaScript, CSS, PHP, and mysql.
- It streamlines blood donation, storage, retrieval, and distribution processes, ensuring efficient management of blood units. Key features include user authentication, donor management, inventory tracking, blood type compatibility verification, request and distribution facilitation, real-time notifications, and robust security measures.
- The user-friendly interface and backend development ensure seamless interaction and data integrity, ultimately contributing to saving lives by optimizing blood bank operations.

### **Reminder**

a robust Reminder application using Java and Swing GUI. Implemented file handling to store and retrieve data, ensuring that your reminders persist even after closing the application.
